

Parts of a Plant

Across

1. Colourful, delicate part of a flower.
4. Sweet liquid found in flowers that attracts insects.
5. Fine, powdery substance that helps plants reproduce.
7. Green leaf-like structure that protects a flower bud.
8. Part of a plant that absorbs water and nutrients from the soil.

Down

1. Living organisms that grow in the ground.
2. Flat, green part of a plant that makes food.
3. The part of the stamen where pollen is produced.
6. Part of a flower that becomes a fruit.
